Professional Experience

AI Engineer

FPT Software

March 2026 - Present (3 months)

- AI Agent Chatbot for Agricultural Machinery

AI Engineer - MLOps Engineer

PIXTA Vietnam Co. Ltd.

May 2019 - February 2026 (6 years, 9 months)

- AI Headshot Image Generation system
- Auto Review system for Photo, Footage and Illustration data.
- Text-to-image generation
- Image aesthetics assessment
- CV SaaS product
- Face recognition and face attributes classification
- Face detection in super-high-resolution images
- Video and tags extractive summarization
- High resolution image synthesis and translation using GANs

Lecturer

MCI Academy - ProtonX - Robiz Tech Academy

Dec 2021 - Present (4 years, 6 months)

- Python for Data analyst
- Python for Machine Learning
- Mathematics for Data analyst
- Python for Deep Learning
- Basic Data Lake with Hadoop
- Basic PyTorch
- Computer Vision

Education & Certifications

Master of science - Mathematics & Informatics

Hanoi University of Science and Technology

Oct 2020 - Aug 2022

Engineer's degree - Mathematics & Informatics

Hanoi University of Science and Technology

Aug 2015 - June 2020

Language

English: TOEIC - 755

Additional Experience

Founder

- Khoang Troi Cua Be (Sep 2016 - Aug 2025)

Speaker - Examiner - Mentor

- NCT JOB FAIR 2024, National Economics University
- ProtonX: PyTorch 101
- Data sience and Technology in start-up
- H4TF PROJECT - DATA ANALYSIS - UNVEIL DATA POWER
- AI Hackathon: Face Analysis Challenge
- NEU Daily Mentoring

Award

- Mentor of the Year at PIXTA Vietnam Co. Ltd., 2024
- Auto Review Project - Project of Quarter at PIXTA Vietnam Co. Ltd., 2024
- CV SaaS Product - Project of Quarter at PIXTA Vietnam Co. Ltd., 2022
- Review Assistant Project - Innovator of the Year at PIXTA Vietnam Co. Ltd., 2021
- First Prize at HUST SAMI Student Scientific Research Contest, 2020
- Self-learner of the Year at PIXTA Vietnam Co. Ltd., 2019

Project Detail

1. AI Engineer: FPT Software (March 2026 - Present)

1.1. AI Agent Chatbot for Agricultural Machinery (2026)

- **Overall:** Build a chatbot system which can answer questions about agricultural machinery and provide some recommendations for customers.
- **Techstack:** LLM, RAG, OpenSearch, Faiss, Langchain, LangGraph, LangFuse, Docker, FastAPI, AWS

2. AI Engineer - MLOps Engineer: PIXTA Vietnam Co. Ltd. (May 2019 - February 2026)

2.1. AI Headshot Image Generation system (2025)

- **Overall:** Build a system which generates high-quality headshot images from input face images using some SOTA text-to-image generation models.
- **Techstack:** DreamBooth, LoRA, Stable Diffusion, Flux, NIMA, TOPIQ, ArcFace, CLIP

2.2. Auto Review system for Photo, Footage and Illustration data. (2023 - 2024 - 2025)

- **Overall:** Build a system which operates upto 15 AI models to handle vast of Computer vision problems, in order to automate Photo, Footage and Illustration reviewing process. Deploy the system and optimize running performance.
- **Techstack:** BLIP2, Detic, YOLOv7, VisionTransformer, Docker, FlaskAPI, TritonAPI, PyTorch, ClearML, Data Pipeline, Training Pipeline, Model Serving, AWS, Kubernetes, VectorDB Milvus, VectorDB Weaviate

2.3. Text-to-image generation (2022)

- **Overall:** Research and understand some SOTA text-to-image generation models.
- **Techstack:** Stable Diffusion, DreamBooth

2.4. Image aesthetics assessment (2022)

- **Overall:** Understand and propose a set of criterias for objective image aesthetics assessment. Research and build a model to rank a list of images base on aesthetics aspects.
- **Techstack:** AVA dataset, AADB dataset, NIMA, Self-supervised aesthetic pretext tasks, PyTorch

2.5. CV SaaS product (2022)

- **Overall:** Deploy and monitor computer vision models as a service. Present and discuss with customer about the product
- **Techstack:** Docker, FlaskAPI, Kubernetes, AWS

2.6. Face recognition and face attributes classification (2021)

- **Overall:** Build face verification model and face analysis model which handles some attributes such as emotion, age, gender, race, hair, accessories ...
- **Techstack:** ArcFace, RetinaFace, VGG2 face pretrained model, PyTorch, Flask API, Docker

2.7. Face detection in super-high-resolution images (2021)

- **Overall:** Build a solution to detect tiny face (~20 pixel) on super-high-resolution image (~6000 - ~8000 pixel).
- **Techstack:** RetinaFace, SNIPER, AutoFocus, Docker, PyTorch, ONNX, Docker

2.8. Video and tags extractive summarization (2020)

- **Overall:** Build a model to extract features from a video and summarize a long list of tags which describe the video into a shorter list.
- **Techstack:** SlowFast, Channel-Separated Convolutional Networks, R(2+1)D Network, Attention mechanism, PyTorch, Docker

2.9. High resolution image synthesis and translation using GANs (2019)

- **Overall:** Generate and control high resolution image generation from noise vector or from a given input image.
- **Techstack:** StyleGAN2, CycleGAN, MUNIT, PyTorch

3. Lecturer: MCI Academy - ProtonX - Robiz Tech Academy (Dec 2021 - Present)

3.1. Python for Data analyst (2021)

- **Overall:** Introduce basic Python programming like data types, control flow, functions, and some libraries like Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn for data analytics.
- **Techstack:** Python, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Anaconda, Jupyter Notebook

3.2. Python for Machine Learning (2022)

- **Overall:** Introduce machine learning ideas and classic algorithms: supervised and un-supervised learning, gradient descent. Train and evaluate machine learning models using Scikit-learn.
- **Techstack:** Scikit-learn, Regresion model, Classification model, Clustering model, Dimensionality reduction model

3.3. Mathematics for Data analyst (2022)

- **Overall:** Review basic math knowledge about linear algebra, calculus, probability and statistics for data analyst and machine learning.
- **Techstack:** Linear algebra, Calculus, Probability and statistics, MLE and MAP

3.4. Python for Deep Learning (2023)

- **Overall:** Introduce simple deep learning models for each type of data: tabular data, computer vision, NLP, computer audition, time series. Introduce some other techniques likes reinforcement learning, semi/self-supervised learning, model compression.
- **Techstack:** CNN, RNN, Transformer, Spectrogram, ARIMA, Reinforcement learning, Semi/Self-supervised learning

3.5. Basic Data Lake with Hadoop (2023)

- **Overall:** Introduce some basic definition in big data and build some demos using Hadoop ecosystem: HDFS, Map-Reduce, YARN, Spark, Kafka.
- **Techstack:** Hadoop, HDFS, Map-Reduce, YARN, Spark, Kafka

3.6. Basic PyTorch (2023)

- **Overall:** Introduce basic PyTorch and PyTorch Lightning syntax to build Dataset, DataLoader, Model, API and use some model compression techniques.
- **Techstack:** PyTorch, PyTorch Lightning, FastAPI, Model Compression

3.7. Computer Vision (2024)

- **Overall:** Introduce vast of Computer Vision problems and models: classification, object detection, image segmentation, face ecosystem, contrastive learning, video processing.
- **Techstack:** PyTorch, CNN, Faster RCNN, YOLO, U-NET, ArcFace, 3-D CNN
